DIN3869 ENCAP Seal Fitting O-Ring Kit

This kit contains DIN3869 Encap Seal Fitting Kit 16 Sizes 130 pcs Nitrile Durometer Shore A 90. DIN Profile Rings, according to DIN 3869 are used as axially static soft seals in combination with threaded elements. Common applications include construction machinery, hydraulic presses, injection machines, fittings, hydraulic valves, and threaded tube connections in general industry. The special shape of Profile Rings enables them to be used in high-pressure applications, compensate for manufacturing tolerances, and provide reliable sealing action.

Hydraulic and Hose fitting O-Ring Kit / BOSS O-ring Kit

This Kit is combination of Face O-Rings and Boss O-Rings. This kit contains 491 pcs in 30 sizes in Nitrile Durometer Shore A 90. Boss seal O-Rings are typically used in hydraulic Hose fitting applications, specifically for use in sealing straight thread tube fittings in a boss. The AS568 specification calls out specific sizes for these boss O-Rings and designates them with “900” series numbers.

O-Ring Measuring Cone Tool

This O-Ring Cone measures 184 of the most popular size O-Rings from ¼" ID to 5-5/8" ID in five standard cross sections (.070", .103", .139", .210", and .275"). This cone will provide the user with O-Ring dash numbers instantly. Just slip the O-Ring into the proper slot to determine the cross section. Then place the O-Ring onto the cone and adjust to the proper step to determine the AS568 size dash number above the slot. Made of durable high density polyethylene. Yellow in color and stands 17 ½" high.

KEVN® O-Ring Rubber Identification Tool

The KEVN® is a practical and useful tool to distinguish between four (4) commonly used O-Ring rubber compounds:

- Kalrez® – Perfluoroelastomer (FFKM)
- EPDM – Ethylene Propylene Rubber (EPR)
- Viton® – Fluorocarbon (FPM, FKM)
- Nitrile – Nitrile Rubber (Buna-N)
